FORMATION

Univ YDE 1, LICENCE 1 - BIOS & MATHEMATIQUES

2023 - 2024

IUT - Douala, DUT - GENIE LOGICIEL

2024 - 2026 | Douala

TECHNICAL SKILLS

HTML5, Tailwindcss & CSS3

Architecting pixel-perfect, responsive layouts. I translate complex, high-end designs into fluid, interactive user interfaces without compromising on performance.

ReactJS & Next.js

Engineering dynamic, SEO-optimized web applications with a focus on lightning-fast rendering and reusable, modular component architectures.

TypeScript & NestJS

Architecting robust, scalable backend systems. I leverage strict typing and structured frameworks to build maintainable APIs that power complex frontends.

Linux Bash

Automating repetitive tasks and streamlining workflows directly from the terminal to keep the development lifecycle fast and efficient.

I'm Wistant, a Software Engineer specializing in high-end digital experiences. I engineer pixel-perfect, ultra-fast interfaces and robust web architectures.

EXPÉRIENCE

DEVELOPPEUR WEB STAGIAIRE, Devia Tech

Douala cmr

I engineered, optimized, and maintained high-performance user interfaces. My core focus was bridging the gap between design and engineering by translating static mockups into fluid, pixel-perfect digital experiences

FULL-STACK PROJECTS

[Rooms](#) , **Hotel Booking Management System**

10/2025 - 01/2026

A comprehensive, production-ready hotel booking platform built with the MERN stack (MongoDB, React, Node.js) featuring advanced search, booking management, analytics dashboard, and payment integration.

[Talent IQ](#) , **The Ultimate Full-Stack Interview Platform**

09/2025 - 11/2025

Talent IQ: The Ultimate Full-Stack Interview Platform - Empower recruiters with AI-powered coding challenges, live pair-programming sessions, and real-time skill evaluation. Built with React for dynamic UIs, Node.js for robust backends
Topics

FRONTEND PROJETS

[Theline Studio](#) ,

portfolio website for The Line, a animation studio based in London

11/2025 - 01/2026

This project is a detailed frontend recreation of the official portfolio website for The Line, a globally renowned animation studio based in London. The primary focus of this clone was to build a highly visual, media-first interface that handles video embeds, complex grid layouts, and brutalist typography seamlessly.

Linux OS

Operating natively within an Ubuntu 24 environment. I possess a deep, hands-on understanding of system administration, network interfaces, and command-line mastery.

COMPÉTENCES

Complex Problem Solving (I thrive on debugging and dismantling technical roadblocks. Instead of panicking when things break, I methodically hunt down the root cause to engineer resilient solutions.)

Methodical & Autonomous (I structure my workflow with precision. Whether balancing academic deadlines or architecting complex frontend projects, I know how to prioritize tasks to deliver high-quality code on time.)

Effective Technical Communication

Natural Leadership & Team Empowerment (I lead by doing and inspire by sharing. I know how to embark a team on a vision, keep the momentum high during challenging sprints, and foster an environment where everyone elevates their game. je sais motiver, expliquer et embarquer les autres.)

Laugh guy (I firmly believe that great software is built by happy teams. I bring a healthy dose of humor and positive energy to the workspace, defusing stress and building genuine camaraderie.)

Curious

SPEAKING LANG

Français: langue maternelle

Anglais: niveau intermediaire

[Obys.agency](#) ,

A premium, award-winning creative agency frontend clone.

03/2026 - 03/2026

This project is a high-fidelity frontend recreation of the Obys Agency website. The goal was to deconstruct and rebuild an Awwwards-winning digital experience, focusing heavily on micro-interactions, custom cursor physics, and complex typography animations. It serves as a showcase of modern web development techniques required to build immersive, boutique-level digital products.

[Flow Party](#) , **hub for web developers and designers.**

02/2026 - 03/2026

[Suburbia](#) , **Real-time 3D Rendering E-commerce** 🚀

03/2026 - 03/2026

Suburbia is an experimental e-commerce frontend demonstrating the integration of real-time 3D rendering within a modern web application architecture. Using **React Three Fiber** and **Next.js App Router**, it provides a seamless shopping experience where users can interact with products in 3D space, heavily optimized through static site generation (SSG).

[Fizzi](#) , **Landing page Live Gutsy, Soda Perfected** 🍷

12/2025 - 01/2026

Fizzi is a highly energetic landing page that introduces a perfect modern soda: *3-5g sugar, 9g fiber, and 5 delicious flavors.*

[Shopdo](#) , **Plateforme E-Commerce Moderne**

Une solution e-commerce complète avec routage produit dynamique, système de panier scalable, et blog intégré pour le marketing.

[Splyt](#) , **3d animated website**

02/2026 - 02/2026

Awwwards-inspired interactive website that recreates a premium, animated product experience directly in the browser. It focuses on smooth scroll-based animations, bold typography, and playful motion to showcase a single product in a cinematic way.

[Significo](#) , **Awards clone website of Significo.com**

01/2026 - 03/2026

Awards clone website of Significa. Significo is a custom health software developer founded on the belief that technology can transform healthcare to put people first

[Ochi.agency](#) , **Ochi Design Agency website.**

02/2026 - 03/2026

A high-end, pixel-perfect clone of the award-winning Ochi Design Agency website.

[Delonghi](#) , **Clone of E commerce platform's delonghi Group**

10/2025 - 12/2025

De'Longhi is a global leader in premium home appliances, blending Italian design and smart innovation to elevate everyday living – from iconic coffee machines to high-quality kitchen and home products.
